

BEIJING CAPITAL AIRLINES | LATEST REQUIREMENTS FOR PASSENGERS ENTERING THE UK

Dear Agent,

According to the requirements of the British government, from June 8, 2020, passengers entering the UK must comply with health and epidemic prevention measures.

According to the latest guidance document issued on August 11, it is updated and re-emphasized that passengers entering the UK must meet the following health and epidemic prevention requirements:

1. Before entering the UK, passengers must log on to the website <https://www.gov.uk/uk-border-control> to learn about the UK border and the public health requirements and relevant important information for passengers entering the UK.
2. Before entering the UK, passengers must fill out and submit the itinerary information declaration form online (<https://www.gov.uk/provide-journey-contact-details-before-travel-uk>) 48 hours in advance to provide British itinerary and contact information. Passengers who refuse to fill in will face a fine of £100, and will face higher penalties for repeated violations.
3. After entering the UK, passengers must self-quarantine in their residence for 14 days. The British government will contact the passenger to confirm whether to self-quarantine according to the contact information on the personal contact information form. Passengers who violate self-isolation will face a fine of £1,000 or further penalties.
4. Non-British citizens and foreign citizens who do not live in the UK who fail to comply with relevant regulations will be refused entry.

Best regards,
Beijing Capital Airlines
